THE BEST HUNDRED BOOKS IN ENGLISH ON CHINA

THE purpose of this short list of the available literature on China is to afford students and others interested in the Far East a convenient means of selecting the best sources of information on all phases of the subject. While all of the books named are not in print they are probably still to be had through booksellers and, for the most part, in public libraries. With very few exceptions none are mentioned that are too costly to be within reach of a library or purchaser in need of a fairly complete collection on China. A few titles in French or German in excess of the hundred supposed to comprise the list are noted, also a few others that might replace books not readily obtainable, so that the heading of this catalog may be justified by actual selection. The bibliography of Christian missions in China is left for another list.
